

LOGISTICS SHEET

Techniclic®

In order to facilitate the preparation of orders, the sending of goods to depot, their storage or the delivery of goods on site, Techniclic boards are packed in different lengths packages.

— WOOD BOARDS

Packaging * : Sold by full pallets.

(*) theoretical packaging, can be modified at any time depending on the productions.

The lengths contained in the packages may vary depending on the production.

Some species even have fixed lengths.

As the lengths are cut at right angles with a tongue and groove system and in multiples of 500mm, the length of the boards does not matter for the installation of the facade with lost joints as recommended by Vetedy.

Packaging : Strapped and filmed boards in bundles*. Sold in full pallets. Each package has a label containing the general characteristics of the product plus a barcode and a QR code leading to the installation instructions for the product in question.

Storage : Dry and clean place, ventilated and protected from light. Improper storage can lead to a dimensional variation of the boards as well as movement or a change in color. After opening a package and returning to stock, the boards must be strapped.

FIXATIONS AND ACCESSORIES *Techniclic*[®]

Packaging :

Article	Pcs/box
Clips 60	340
Clips 100	212
Clips 140	154
Bases B-tech	50
